

Our highly skilled staff are focussed on our residents and driven by our values of respect, responsibility, community and spirit. All Benetas staff are carefully selected for their qualifications, experience and commitment to supporting older people to live happy, healthy lives. Staff in caring roles are required to have a minimum of Certificate III (Aged or Community Care) qualifications and undertake regular training. We employ qualified nursing and professional staff with expertise in aged care and dementia, who are supported by our Quality and Continuous Improvement Team to provide care of the highest standard. The bonds that form between our staff and residents are strong, resulting in many of our staff staying and working with us for many years. This relationship is important, so we avoid using agency or temporary staff wherever possible.
