SUPPORT AT HOME PROGRAM CLIENT CO-CONTRIBUTIONS

New Support at Home participants

From 1 November 2025, Support at Home launches with a principle-based service list with three service types:

1. Clinical care
2. Independence
3. Everyday living

The government will cover the full cost of your clinical care, with your contributions going towards things you would typically pay for your whole life, like everyday living expenses and services to maintain your independence.

How much you contribute will be based on the age pension means-test.

The higher your level of need, the larger your support package and the more the government will contribute to your care.

A lifetime contribution cap of \$130,000 will apply to contributions a person makes to both their Support at Home and to the cost of their non-clinical care in residential care.

	Clinical care	Independence	Everyday Living
Full Pensioner	0%	5%	17.5%
Part pensioners & Commonwealth Seniors Health Card holders	0%	5% - 50% depending on income/assets	17.5% - 80% depending on income/assets
Self-funded retiree	0%	50%	80%

No worse off principle

A no worse off principle will apply to people who, on 12 September 2024, were either:

- receiving a Home Care Package (HCP),
- in the National Priority System,
- assessed as eligible for a HCP.

The no worse off principle will ensure these participants make the same contributions, or lower, than they would have had under Home Care arrangements. When these participants move to residential care, they will stay on the existing contribution arrangements unless they opt to move to the new program.

People who have a HCP, or who are in the National Priority System, or who are assessed as eligible for a HCP before 1 November 2025 will receive the same package level under Support at Home when the program starts, including any unspent funds.
